Dear Sherri,

Just wanted to say:-

After our initial abortive attempts to discourage the geese from using our property. I am completely impressed with the job you and your team has done with getting the geese off the property and keeping them off. The professionalism you showed in getting the job done without offending any of our associates was fantastic. It is now 30 Aug and we still have no geese!!

The environmental impact has been positive as we have had no accidents with the geese this year and the trucks are not sitting idling waiting for the goslings to cross the road. The facility is much cleaner without the goose droppings. And no associates have been molested.

The activity was cost effective as the money we had spent on the simple deterrents was wasted, they simply didn't work.

Thanks to you and the team our facility is a cleaner, safer, happier and, I daresay, greener, place. We will be using your services again next year. And I will not hesitate in recommending your service to others.

Sincerely,

Peter Dawson
Maintenance Manager
Tire Assembly Division
